#### Forest Service Manual

##### Chapter 2640—Stocking and Harvesting Amendment No. 95-2600

(Note: The Forest Service organizes its directive system by alpha-numeric codes and subject headings. Only those sections of the Forest Service Manual that are relevant to this notice are set out here. The final policy also includes minor revisions to existing codes and subject headings. The audience for this direction is Forest Service employees responsible for coordinating wildlife management on National Forest System lands with State fish and wildlife agencies.)

**2643—Applicability of State Fish and Wildlife Laws and Regulations.** The Forest Service actively cooperates in the development of State fish and wildlife laws and regulations and may assist in the enforcement of State fish and wildlife laws on National Forest System lands. Pursuant to FSM 2610, Regional Foresters shall ensure that memorandums with State fish and wildlife agencies recognize the role of the Forest Service in cooperating in the development of State fish and wildlife laws and regulations, especially those addressing hunting, fishing, and trapping as they would apply to occupancy and use of National Forest System lands.

**2643.1—Hunting, Fishing, and Trapping Regulations.** Hunting, fishing, and trapping of fish and wildlife and associated practices on National Forest System lands are subject to State fish and wildlife laws and regulations, unless one or both of the following apply:

1. State fish and wildlife laws and regulations conflict with Federal laws; or
2. State laws and regulations would permit activities that conflict with land and resource management responsibilities of the Forest Service or that are inconsistent with direction in forest plans.

**2643.12—Use of Bait for Resident Game Hunting.** The use of bait for the purpose of taking resident game on National Forest System lands in a hunting practice.

The practice is prohibited on National Forest System lands where State hunting regulations prohibit its use. Where States permit the use of bait for attracting resident game, this activity is allowed on National Forest System lands, subject to State hunting laws and regulation, unless the authorized officer determines on a site-specific basis that there is a need to prohibit or restrict the practice.

1. The authorized officer shall continually monitor State hunting regulations with regard to the use of bait. A site-specific restriction or prohibition on baiting shall occur when the authorized officer determines that one or more of the following circumstances exists:

- a. The State laws and regulations on placement of bait are not adequate to protect forest land, other resources, or users in a particular location. The determination of the adequacy of State laws and regulations shall be based on consideration of the likely

impact of baiting on such matters as water quality, public health and safety, the potential for litter, sanitation problems, or the potential to threaten the viability of wildlife;

- b. The effects of baiting are not consistent with direction in the applicable forest plan; and

- c. The State laws and regulations conflict with Federal law, such as the Endangered Species Act.

2. Where the authorized officer determines that baiting must be restricted or prohibited, the following actions are necessary:

- a. The officer shall immediately inform the State fish and wildlife agency of the determination; and

- b. If, after consultation and coordination, the State is unable to resolve the matter with the Forest Service, the authorized officer shall close the area to baiting or otherwise restrict baiting by issuing an order pursuant to Part 261 of Title 36 of the Code of Federal Regulations (36 CFR Part 261).

3. Where the hunting season is underway and it would be impracticable to issue an order to close an area to baiting, the authorized officer shall take such measures as appropriate and practicable to ensure consistency with forest plan management direction; compliance with Federal laws, orders, and regulations; and protection of forest users and resources. For example, the officer might close a road or gate to restrict access.

Closure of an area to baiting is not the only way to address the practice of baiting. It is expected that land managers as part of their day-to-day management of National Forest System lands and resources will be cognizant of the effects of hunting activities and take such proactive measures as may be necessary to ensure resource protection. Also hunter education programs could be implemented in consultation with the State agencies.

The policy in this section, in and of itself, does not compel an authorized officer to undertake a specific decision to allow baiting on National Forest System lands in those States where the practice is permitted. Nothing in this section shall be construed to affect valid existing treaty rights of American Indian Tribes. For the purposes of this section and to assure consistency in coordination of national forest wildlife matters with State agencies, the authorized officer is the Regional Forester or Forest Supervisor responsible for executing memorandums of understanding with the State wildlife agency (FSM 2610).
